

SHOW PIG FEED **SHOW** ShowMax® PRE-STARTER

PRODUCT PURPOSE

A complete feed for pigs weighing 10-15 pounds.

Control of swine dysentery associated with Brachyspira (formerly Serpulina or Treponema) hyodysenteriae susceptible to Tiamulin. Treatment of bacterial enteritis caused by Escherichia coli and Salmonella choleraesuis and bacterial pneumonia caused by Pasterurella multocida susceptible to Chlortetracycline.

DESCRIPTION

Designed to be "creep" fed and fed as sole ration at weaning to one week post weaning. Contains high level of milk, sugars, and other ingredient to promote the baby pig to go to feed as soon as possible.

FEEDING DIRECTIONS

Feed as the sole ration to pigs weighing 10-15 pounds.

CAUTION: Do not feed to animals other than swine. Use as the only source of Tiamulin and Chlortetracycline. The effects of Tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. Swine being treated with Tiamulin should not have access to feeds containing polyether ionophores (eg: Monensin, Lasalocid, Narasin, Salinomycin and Semduramicin) as adverse reactions may occur. If signs of toxicity occur, discontinue use of medication.

SPECIAL CONSIDERATION

Protect medicated feeds from excessive temperatures. Do not store at warm temperatures, 104° F (40° C), for more than 7 days.

LIMITATIONS FOR USE

Feed continuously as sole ration for 14 days. Not for use in swine weighing more than 250 lb. Fed approximately 400 g/ton of Chlortetracycline, varying with bodyweight and feed consumption to provide 10 mg/lb. of bodyweight per day.

CAUTION: Follow the label directions. The addition to feed of higher levels of this product containing selenium is not permitted.

*One unit of phytase activity (FTU) is defined as the quantity of enzyme which liberates 1 micro-mole of inorganic phosphorus per minute.

WARNING: This product, which contains added copper, should not be fed to sheep or related species that have a low tolerance to copper.
